
goMINT Tokenomics.

The cross-chain liquidity network.

MARCH 2022¹

¹Subject to change, with ongoing improvements and governance decisions expected as the protocol matures.

About goMINT.

The governance and utility
token of the algomint
network.

GO TO [ALOGMINT.IO](https://alogramint.io) NOW

Algomint is a cross-chain liquidity network, with a focus on maintaining liquid interoperability while safely and securely optimising capital efficiency and cross chain transactions.

goMINT is the protocol's native governance token used to manage the Algomint DAO which also controls the DAO treasury that is the recipient of all fees generated on the platform. Users will stake their goMINT tokens to participate in governance and earn rewards.

goMINT Utility.

As Algomint moves to be a decentralised smart contract platform the goMINT token will become critical to governing the protocol.

- ↗ Governance will be implemented once the token is sufficiently decentralised. Token holders will govern a range of activities such as:
 - ↗ Addition or removal of tokens into the bridge and baskets.
 - ↗ This will become particularly useful for stable coin projects wanting to ensure peg maintenance and inclusion in the stable coin baskets.
 - ↗ Fee structures.
 - ↗ Treasury management, including rewards, incentives and grants.
 - ↗ New blockchain integrations and partnerships.

Additional utility is also being reviewed on an ongoing basis.

Token Allocations.

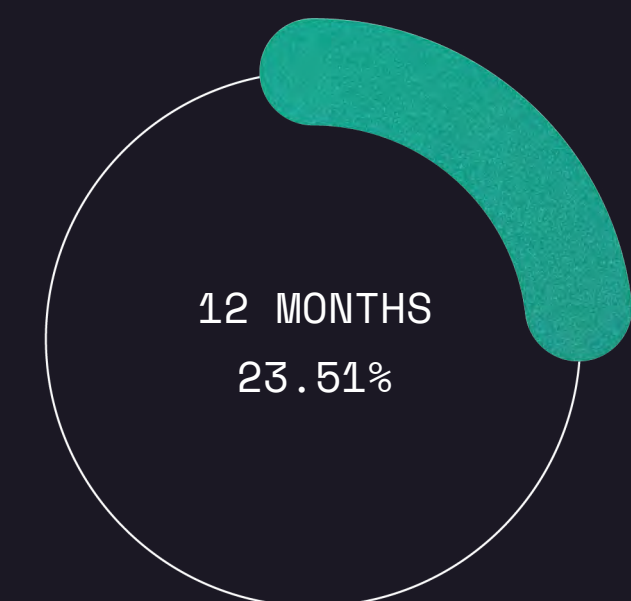

Total Supply → One Billion
(1,000,000,000)

Supply Type → Fixed

Expected Emissions
Schedule → 5-8 years

CIRCULATING SUPPLY
ESTIMATE

TREASURY → 48.5%

485,000,000

Focused on community incentives and rewards programs. As well as grants, partnerships, future funding and advisors.

Expected to have a 5 - 8 year life.

PUBLIC RELEASE → 2.5%*

25,000,000

Token TGE with the token being released and made available to the public.

FOUNDERS & TEAM → 25%

250,000,000

Dedicated to the founders and team.

Initial 12 month lock followed by a 2 year linear vesting schedule.

STRATEGIC SALE → 6.5%

65,000,000

USD\$60,000,000 Valuation, funding raise completed in Q1 2022. Targeted at liquidity and high value partners. 5x Investment was required in liquidity commitment for 6 months or equivalent value in other areas.

3 years linear vesting schedule.

SEED → 12.5%

125,000,000

USD\$15,000,000 Valuation, initial funding raise completed in Q3 2021.

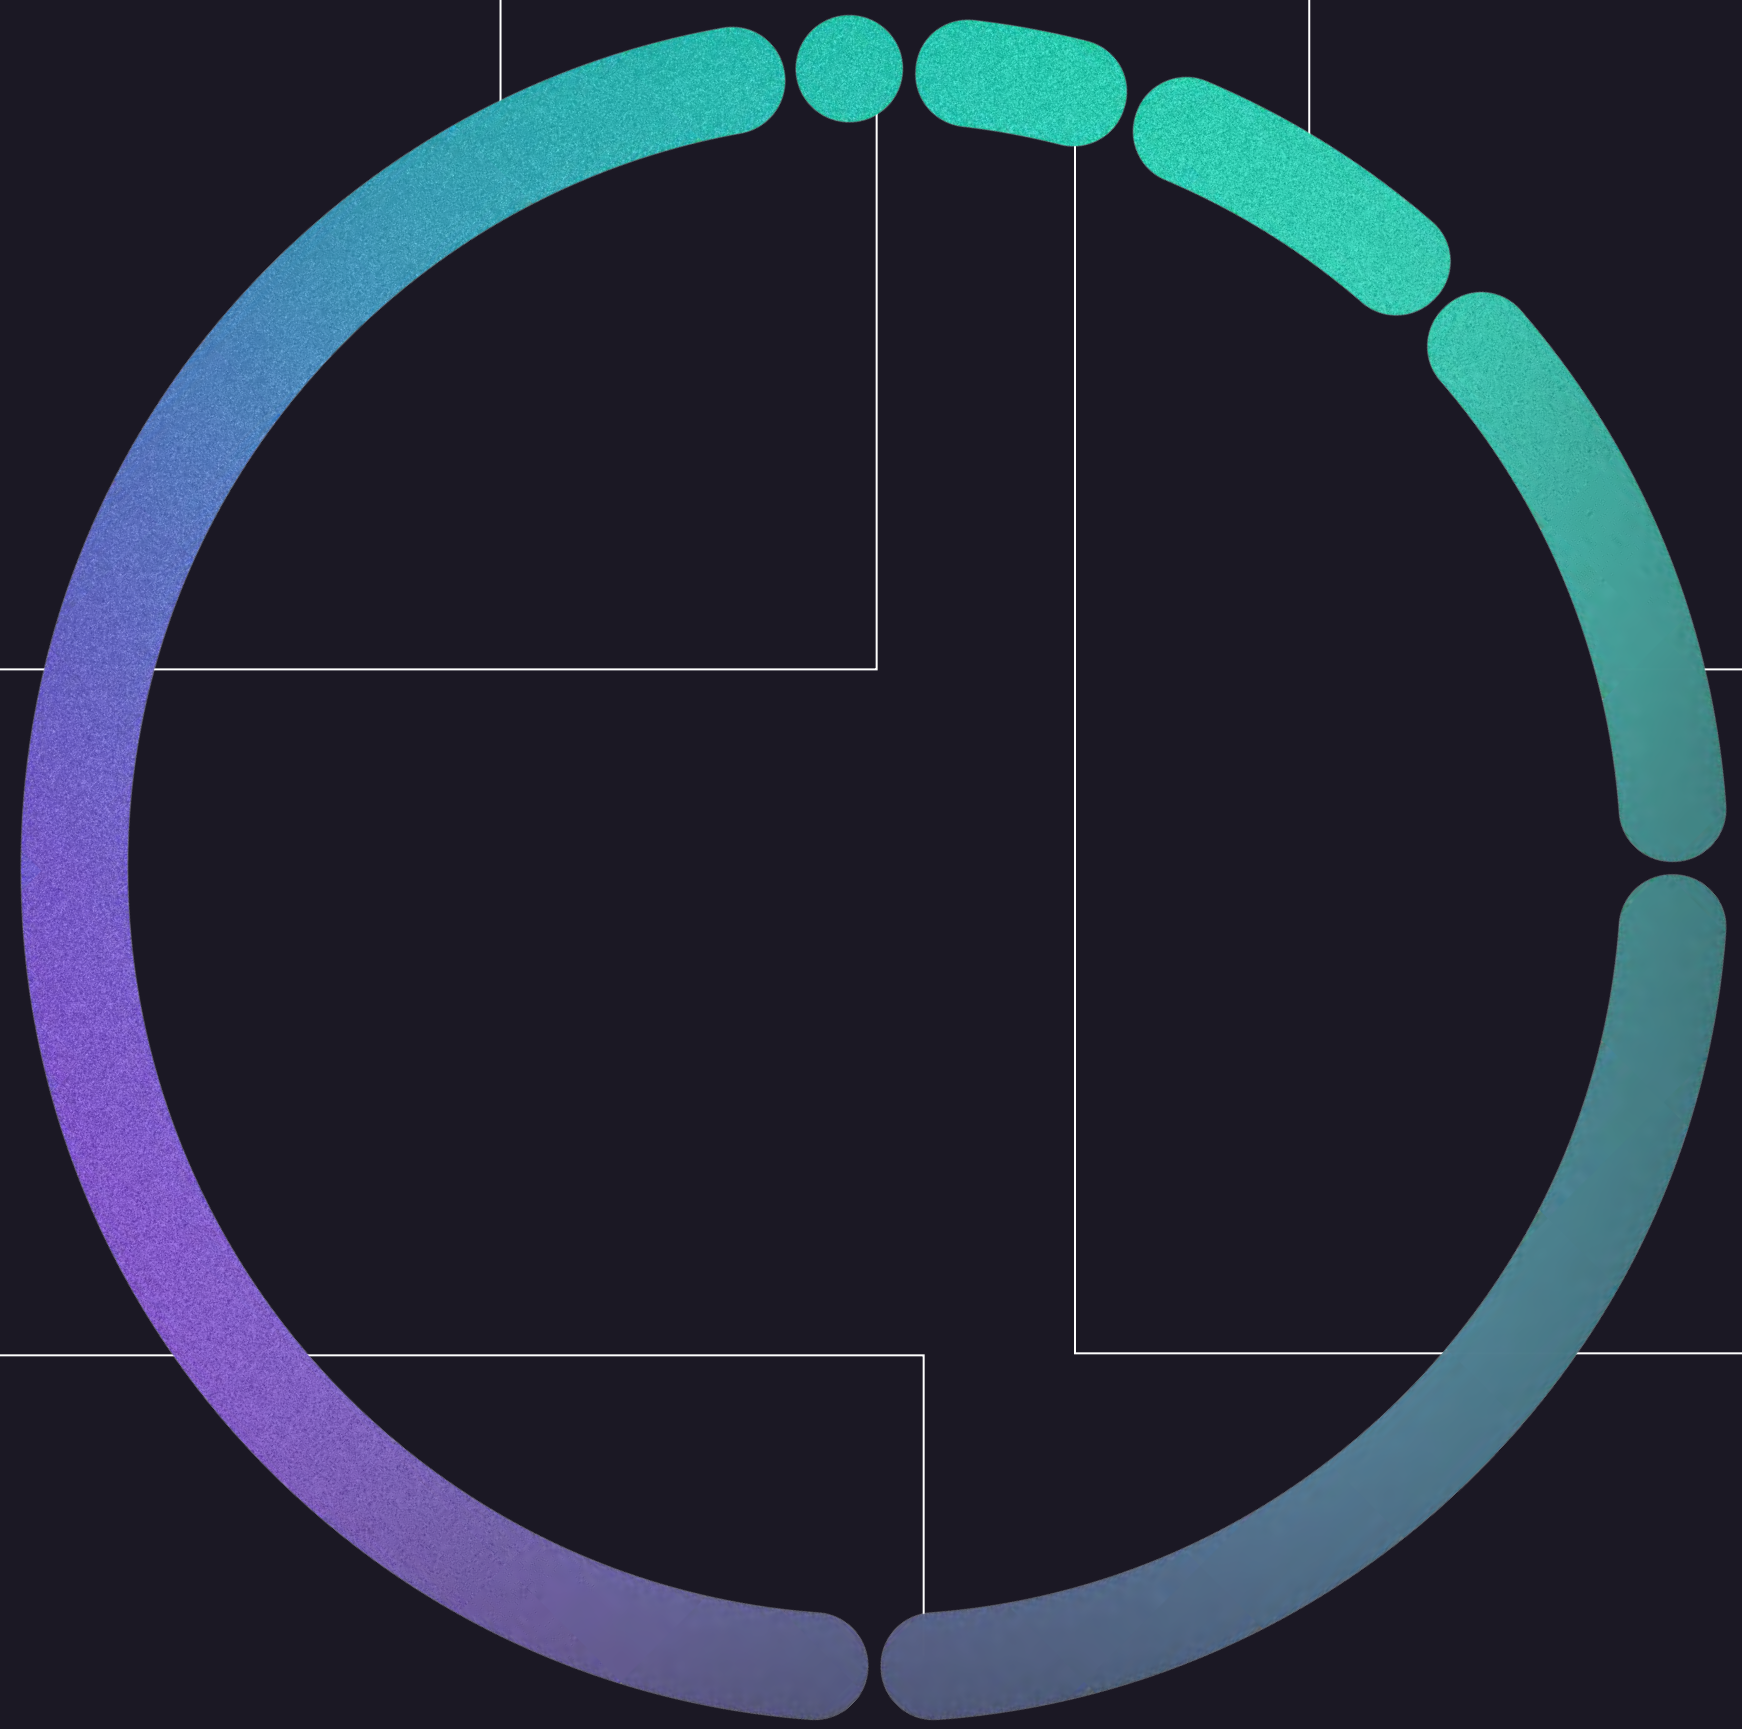

3 years linear vesting schedule.

ADVISORS & EARLY PARTNERS → 5%

50,000,000

Allocated to early backers and partners who provided resources and funding.

3 years linear vesting schedule.

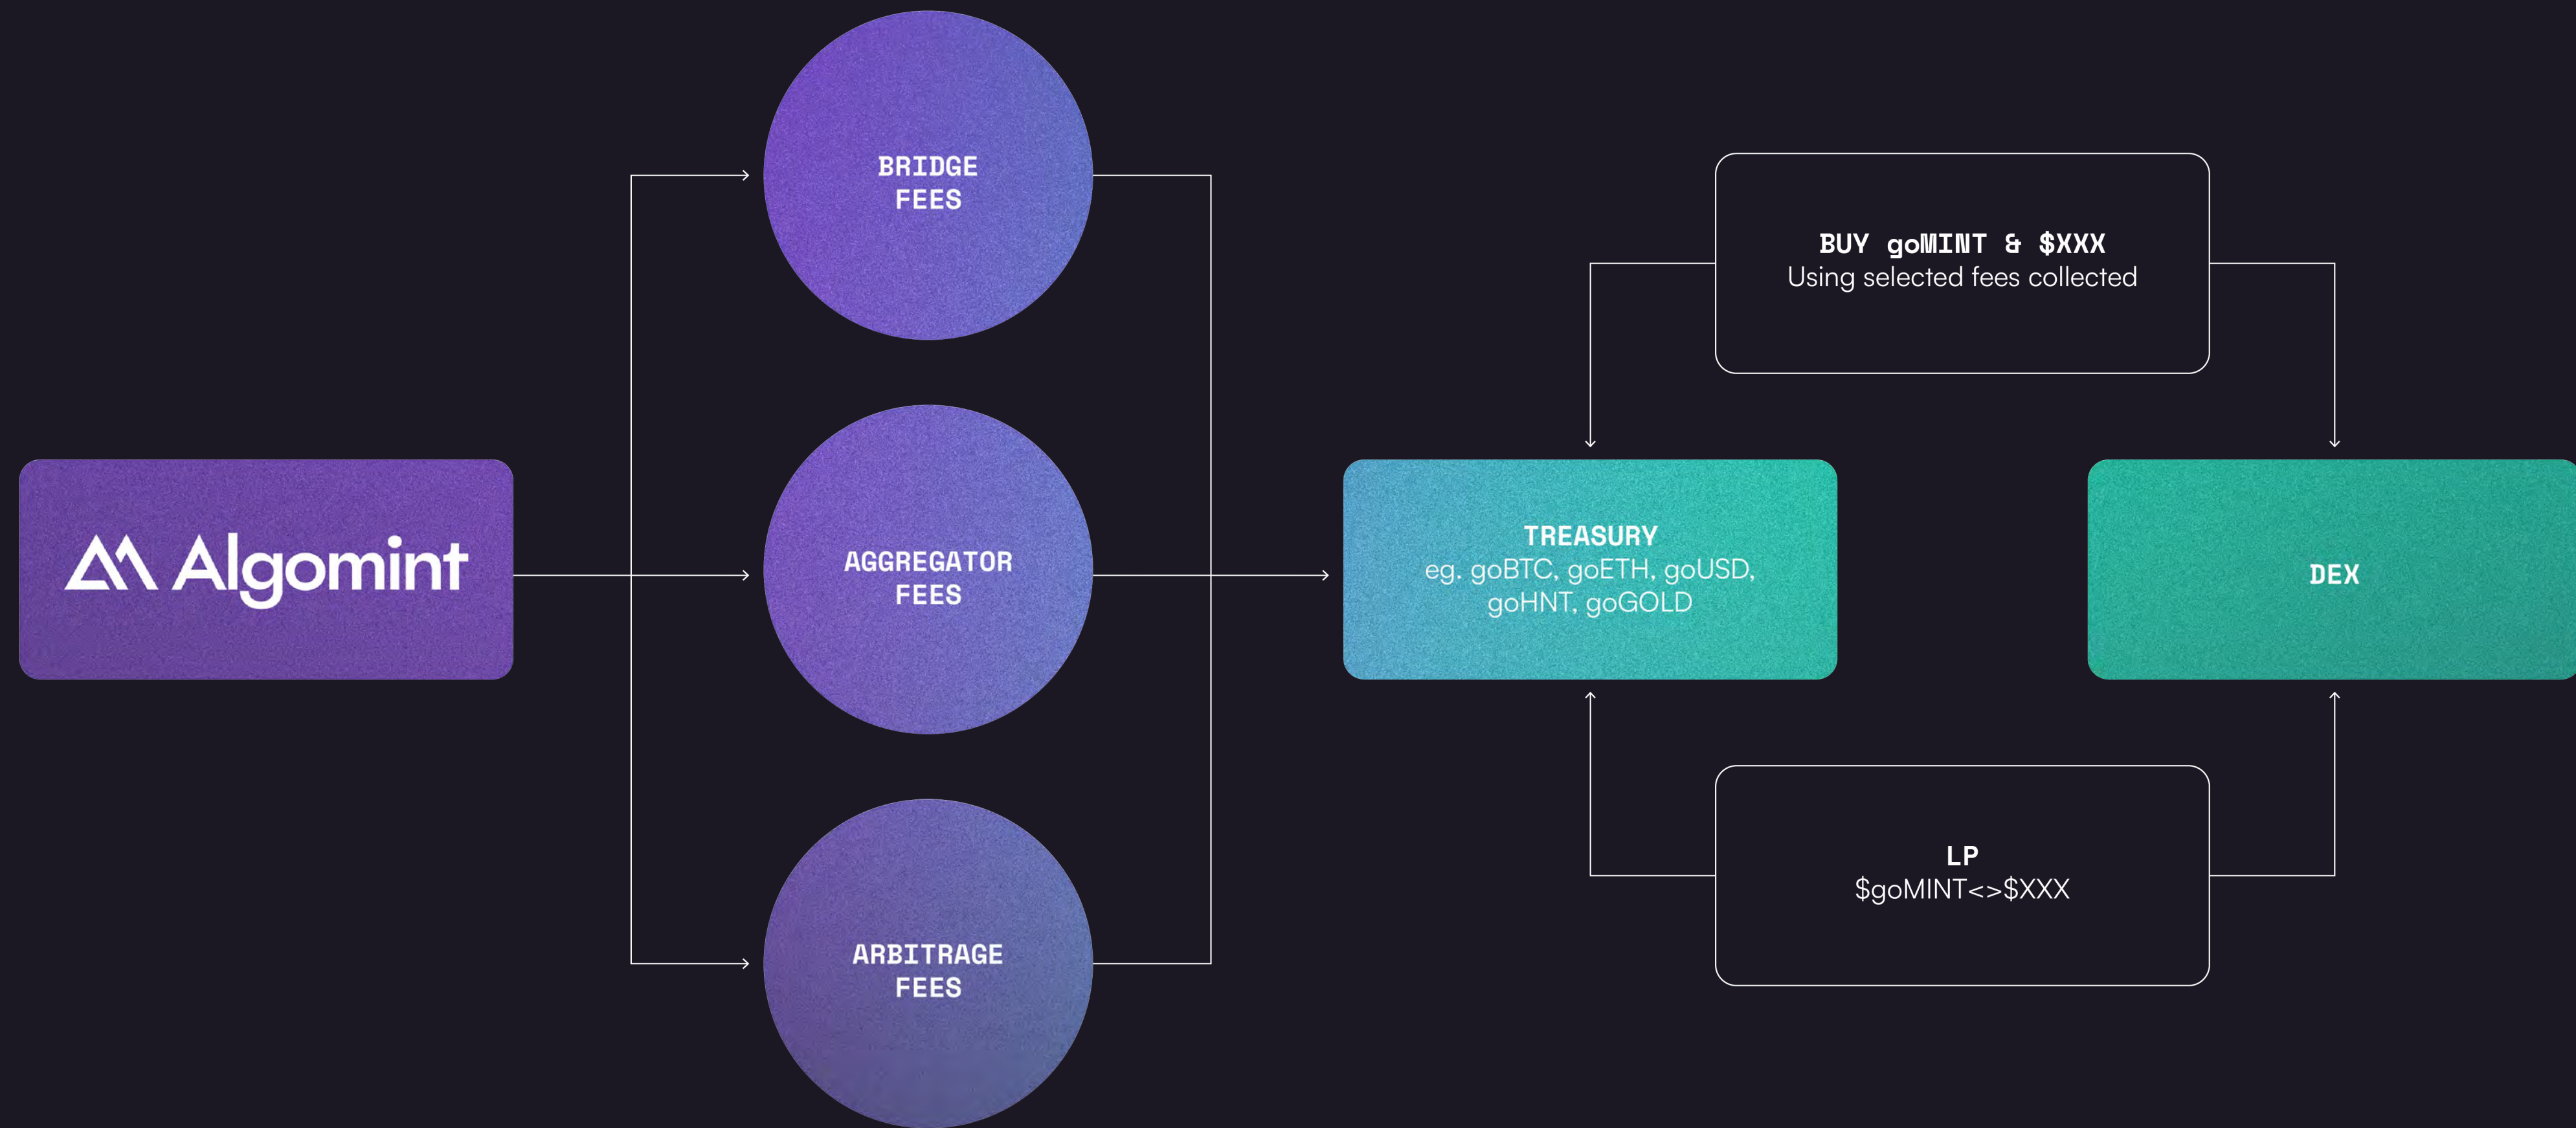

*2.0% is the estimated public release, this figure may vary according to public demand but will be capped at 5% with any extra tokens needed being taken from the treasury.

A portion of fees collected by the Algomint protocol will be converted into \$goMINT and \$XXX³ LP pairing inside one or multiple DEXes. Any fees collected in \$goMINT will remain in the treasury until they can be LP'd.

This achieves three things.

- Removes goMINT tokens from the market.
- Creates deeper liquidity in the goMINT token.
- Long term revenue source through LP trading fees.

³The pairing token will initially be \$ALGO, but may vary over time. A focus on deep consolidated liquidity will be the focus.

Token Allocations.

Initially rewards and incentives will be fuelled from the Treasury allocation of goMINT tokens, but once depleted it is expected that protocol fees will shift to the Buy-&-Make model for rewards and incentives. With the treasury expected to last 5+ yrs this will provide a significant runway allowing the treasury to amass a sufficient LP position generating long term revenue and providing deep liquidity in the goMINT token.

Thank You.
